

OIL, GAS & LODGING SERVICES

LINE LOCATING

Clean Harbors Locating Services provide the pre-planning, project management, locating, GPS surveying and GIS mapping of your underground utility and buried facility lines in advance of your ground disturbance activities.

Each site, locate and reporting process varies greatly from job to job, yet your basic needs and expectations remain much the same. We provide highly trained professionals who will meet your needs and expectations head-on, time after time, no matter how hard the job is, or where your location is. We employ those professionals, whose integrity and confidence in their work help us focus on quality, efficiency, damage prevention, health and safety management, environmental responsibility and customer satisfaction.

Services We Provide

- Oilfield Lease and Pipeline Construction
- Private Line Locating
- One-Call Management
- Wellsite and Pipeline Abandonment
